

# COLOUR FRAMED SHOWER WALL

## INSTALLATION INSTRUCTIONS

If you install the product in a way that differs from this manual this will void all guarantees. Before installation check that the product meets all your requirements and is not damaged. By proceeding with installation, you accept the condition of the product. The wall plugs supplied with the installation kit are for use in solid walls. Hollow or 'stud partition' walls will require alternative fixings. Please consult your local hardware supplier for the correct type.

# Installation Steps

Step in min 10mm and mark the wall profile screw hole locations on the wall

1

Drill, silicone and install the wall profiles using 4 wall fixings.

2

4

Secure the wall profile to the wall using the wall fixing screws.

3

4

5

# Support bar installation -

Choose between one of two possible rail fixing positions on the top rail 5A or 5B on upright profile.

Adjust the shower enclosure ensuring it is level. Drill 4 equally spaced holes along the length of the wall profile to secure the shower wall.

6

Seal the shower unit

7

Allow 24 hours for silicone to dry before use.
